PROFILE

Organisations rarely fail on strategy. They fail on the machinery underneath it, the governance nobody owns, the process nobody wrote down and the change nobody sustained. Builds that machinery end to end, diagnosing with evidence, designing the operating model, policy, lifecycle and governance, and building the capability and tooling so clients can run it independently. 7+ years across transformation, business excellence and operations, covering PMO and portfolio functions, policy and SOP architecture, enterprise Agile at scale, CMMI and maturity uplift, Lean Six Sigma delivery and reusable AI accelerators across banking, development finance, technology and manufacturing.

PMP® · Lean Six Sigma Black Belt (ICBB) · CMMI Associate · MBA, Operations Management (SIOM)

CORE COMPETENCIES

Transformation: business case, target operating model, as-is/to-be, roadmap, benefits realisation

PMO & Portfolio: PMO set-up, intake and prioritisation, KPIs, dashboards, steering committees

Maturity & Capability: CMMI DEV/SVC, High Maturity, maturity frameworks, competency models

Governance & Process: policy and SOP design, RACI, DoA, BPMN 2.0, lifecycle and stage-gate design

Agile & Delivery: Scrum and Kanban at scale, Agile playbook and CoE, Azure DevOps, Jira

Operational Excellence: DMAIC, RCA, nested Gage R&R, SPC, Minitab, change management

PROFESSIONAL EXPERIENCE

Grant Thornton Bharat LLP, Gurugram
Jun 2025 to Present

Assistant Manager, Business Excellence

- Authored a group-level sourcing manual for a leading UAE banking group, codifying policy, roles, RACI, controls and decision rights across six procurement towers, and defined the end-to-end P2S2C lifecycle with stage-gates.
- Coordinated seven enterprise policies and 40+ supporting procedures across seven functions for a UAE-based AI and cloud enterprise, each with RACIs, controls and approval workflows, managing stakeholders and functional SMEs.
- Defined the product and project management lifecycle and set up a governed policy repository with named owners, approval workflows and refresh cycles, aligned to regulation through traceability matrices.
- Documented process universes to L2/L3 in BPMN 2.0 and Visio with RACI, controls, KPIs and SOPs, and built standardisation roadmaps that reduced operational variance across locations.
- Designed e-invoicing transformation plans improving statutory compliance and process efficiency.

KPMG India, Gurugram
Apr 2023 to Jun 2025

Consultant, Business Excellence

- Led enterprise Agile transformation across 106+ project teams for a global IT services firm, moving them to Scrum and Kanban on Azure DevOps, lifting delivery efficiency 30% and cutting recurring issues 20%.
- Authored the Agile Playbook and Governance Plan, rolled out health surveys and adoption dashboards, and established an Agile Centre of Excellence to scale adoption across business units.
- Led CMMI DEV and SVC Level 3 implementation for a Hong Kong-based IT services company, closing workflow gaps, enhancing the QMS and facilitating a successful ML3 appraisal.
- Set up a portfolio and PMO function end to end for an Indian IT infrastructure company, covering governance, intake and prioritisation, KPIs, reporting cadence, escalation and the business lifecycle.
- Designed a competency framework for project and programme managers at a global technology manufacturer, raising maturity from 3.1 to 3.8 within six months.
- Implemented CMMI-SVC processes for an Indian IT infrastructure services firm, and delivered CMMI High Maturity advisory as an Appraisal Team Member on benchmark appraisals.

Intugine Technologies, Bengaluru
Apr 2022 to Jun 2022

Product Intern

- Prioritised 16 features for mobile adaptation of a parcel-tracking web application, built wireframes and authored the Product Design Document and user stories. Ranked first in the SIOM summer internship evaluation.

Tata Consultancy Services, Noida and Chennai Oct 2017 to Sep 2021

System Solution Engineer

Earlier: System Support Engineer (Nov 2018 to May 2020) · Assistant System Developer (Feb 2018 to Oct 2018) · Assistant System Engineer, Trainee (Oct 2017 to Jan 2018)

- Led QA and SIT for a prescription management platform deployed across 9,000+ US pharmacy stores during migration to Microsoft Azure, authoring 100+ test cases a week and sustaining 90%+ sprint accuracy.
- Acted as proxy product owner, surfacing 20+ previously undiscovered gaps per month in Jira across 50+ epics.
- Directed cross-geography application support for a global home-furnishings retailer at a 100% customer satisfaction index, delivering 50+ problem requests at 94%+ accuracy and reducing batch job failures 25%.
- Ran root-cause analysis on product pricing anomalies under offers worth €50M per week, and delivered 30+ PL/SQL change requests with only two low-priority defects.

AI-DRIVEN TRANSFORMATION

Maps every AI and automation use case on a 6-band spectrum of cost of ownership, time to first value and nature of return, so each one is chosen for value and backed by a sharper cost-benefit case before any build starts.

- **Lifecycle and cycle time.** Identified AI use cases along the business lifecycles built for two technology clients, banding each on the spectrum to target cycle-time reduction.
- **Procurement.** Identified AI use cases across procurement activities for a leading UAE banking group and a multilateral development finance institution, banded for value before build.
- **Portfolio prioritisation.** Facilitated the banding of 26 candidate initiatives, splitting those returning hours from those returning revenue, with every cost assumption visible to leadership.
- **Tools built.** Built BPR++ for AI-native process redesign, an AI maturity assessment tool, an RFP-to-proposal engine and a maturity-framework builder with Claude and Claude Code, each a codified skill with gated review and a fixed output contract.

SELECTED OPERATIONAL EXCELLENCE PROJECTS (MBA)

- **Exxelia Alcon Electronics:** reduced capacitor rejection 25% across 135+ SKUs using DMAIC, nested Gage R&R and control charts. Ranked first in the Lean Six Sigma Black Belt project evaluation. Delivered ₹62.6L in annual savings through JIT planning and machine investment analysis.
- **Starlite Lightings:** cut unplanned downtime 40% through breakdown analysis, Fishbone and 5-Why, and a preventive maintenance SOP.
- **Orgatma Organic Science:** developed an operating model revamp using 5C analysis and cost-benefit analysis of factory-level inefficiencies.

EDUCATION

MBA, Operations Management, Symbiosis Institute of Operations Management, 2021 to 2023 · CGPA 7.92 · Top 2% · Rank 1 in Semester 4 · National Finalist, Wipro B.Pro 2.0 · 8+ national case competition wins

B.Tech, Electrical Engineering, Deenbandhu Chhotu Ram University of Science and Technology, Murthal, 2013 to 2017 · CGPA 8.00 · Top 5% · Honours · Haryana Government Topper Scholarship

CERTIFICATIONS & AWARDS

Project Management Professional (PMP)®, PMI, 2024 · Lean Six Sigma Black Belt (ICBB), 2023 · CMMI Associate, ISACA, 2024 · CSM® and CSPO®, Scrum Alliance, 2023 to 2024 · Atlassian Agile Project Management Professional, 2024 · Google Data Analytics, 2022 · ITIL Foundation, 2018

Spot Award, Team Player, Grant Thornton Bharat, 2026 · Above and Beyond Award, KPMG India, 2024 · Service & Commitment Award, TCS, four consecutive years · Highest Skill Points, TCS Initial Learning Program
